BONDER LINE - STRIP WIDTH 250-600 MM - 2.0-4.0 MM - LAYER 1.0-5.0 G/M²

Ref. No.: BONDERM200601

Year:

Brand:

Qty. 1 Second-hand bonder line

Bondern is a process for the surface treatment of metal surfaces and for producing a conversion

layer by phosphating. It serves to protect against corrosion. In further processing steps such as

deep drawing, the phosphating created serves as a sliding layer.

Mfc.: TBA Built

Strip width: 250 ? 600 mm Thickness

De-coiler ID 500 mm OD 600 ? 1900 mm

Coiler ID 500 mm OD 600 ? 1580 mm

Plating Double sided: 1.0 ? 4.0 g/m² Single sided

Note: 3 g/m² = approx. 2 µm layer thickness
